FIVE THOUSAND KILLED BY MOB

Forty-Eight Hours Of Rioting In Odessa Leaves The City All In Mourning.

IT WAS AN ATTACK ON THE JEWS

Police Joined With Loyalists In Sacking The Ghetto Where The Sidewalks Are Strewn With The Dead.

[SPECIAL BY SCRIBNER'S MAGAZINE]
Odessa, Nov. 3.—After forty-eight hours of almost indescribable anarchy and bloodshed, the troops late Thursday evening succeeded in clearing the streets of the mobs and semblance of order has been restored.

Within three hours of the declaration of martial law, which came to the unspeakable relief of peaceable citizens, no fewer than 5,000 ruffianly loyalists had been disarmed by the students and the military. How some 5,000 artisan rowdies became possessed of revolvers and an abundance of cartridges is a question requiring solution. A rigorous curfew law has been proclaimed, and is welcomed as a deliverance from the terrors that have prevailed. Any one in the streets after nightfall is liable to arrest; any one appearing at open windows or on balconies risks being shot without warning.

It is believed that 5,000 persons were killed or wounded in Odessa on Tuesday and Wednesday.

The principal sufferers were the Jews. The demonstration seemed to be directed solely at them.

Murderers and Patriots.

The work of murder, rapine and pillage was carried on by two classes—one made up of the rogues and thieves from the lowest slums in the city and the other made up of "loyalists," with whom the police fraternized and the troops sympathized.

Most of the murdering and plundering took place in the Jewish quarter, where the dead still strew the streets and sidewalks. Jewish men were shot down wherever found. Jewish women and children were strangled and hacked to pieces in the streets. The *Kishinev* horrors were repeated a hundred-fold.

The orgy of blood and pillage which began Tuesday night continued all day Wednesday and all Wednesday night and was resumed Thursday morning.

Wednesday night was especially hideous. Bodies of "loyalists," with whom the police fraternized, marched through the principal streets, bearing

Annapolis, Md., Nov. 3.—Admiral "Bob" Evans gave an elaborate dinner last night aboard his flagship, the Maine, in honor of Prince Louis of Battenberg and his officers. Today the Prince and his staff visited Washington, and Saturday President and Mrs. Roosevelt will entertain them at dinner.

NARROWLY ESCAPED DEATH FROM KICKS

Sim Burdick Stricken with Neuralgia of the Heart While Harnessing Horse,

While adjusting a harness to a horse in the Flagler and Chesboro livery barn at 158 and 160 West Milwaukee street late yesterday afternoon, Sim Burdick, an employee, was stricken with neuralgia of the heart and fell in a heap beneath the animal. The horse has a reputation as a kicker but stood motionless and Burdick's escape from being beaten to death by the animal's hoofs was miraculous. Medical aid was summoned and today the stricken man is resting easily, though unable to return to work. It will be remembered that Burdick was taken ill similarly some months ago while driving a buss and was run over by the vehicle, though not seriously injured.

NEGROES TO HAVE A TRUST COMPANY

Most Gigantic Financial Undertaking Ever Attempted by Colored People is Planned.

[SPECIAL TO THE GAZETTE]

Louisville, Ky., Nov. 3.—A preliminary meeting has been held here for the formation of an Afro-American trust company, with \$500,000 capital. The scheme is the most gigantic financial undertaking ever attempted by colored people. The idea originated with T. Thomas Fortune, editor of the New York Age, the official organ of the colored people of New York and influential throughout the country. The concern will be known as the Afro-American Trust company and will have its headquarters here. Eight Negro banks operating in Alabama, South Carolina, Mississippi, Tennessee and Kentucky have pledged their support. It is the purpose of the company to transact a general banking business and perform the functions of a trust company.

M'KAY DIED FROM WOUNDS RECEIVED

Chief Sealer of the St. Paul Road Was Killed in Place of Another Man.

Wausau, Wis., Nov. 3.—J. A. Mc Kay, chief sealer of the C. M. & St. P. road, died this morning as the result of a wound from a bullet meant for Senator Wright of Merrill. A man named Lloyd fired after a quarrel with the senator.

GIRLS' "GYM" CLASS BEGINS WORK AGAIN

First of Weekly Winter Classes Held in High School Building Yesterday Afternoon.

Yesterday, the first Wednesday in November, the work of the girls' gymnasium class of the high school, which was dropped at the beginning of May last spring, was resumed. Last year two classes, totaling a member or more than seventy-five, were conducted each week by Miss Mabel Fletcher, but this year there will be but one class consisting only of those who took the athletic work last year. There will be about thirty-five young ladies of the three upper classes in the gym class and they will spend an hour and a half each Wednesday afternoon taking Swedish athletics under the direction of Miss Fletcher.

The state board of control has let a contract to the Milwaukee Bridge company for the construction of a railroad turn-table at the state prison at Waupun for \$740 and one to the Hoffman Building and Manufacturing company of Milwaukee for steam pipes at Waupun for \$1,007. Owing to the absence of Prof. Conover, who has been attending the national conference of charities and corrections at Lincoln, Neb., the board did not elect a successor to Deputy Warden E. S. Harvey of the state prison. It is probable that Acting Deputy Curtis will be promoted to the position.

Troubles at the Racine high school, caused by a class rush of the juniors against the seniors, resulting in Thomas Kearny barely escaping being thrown into the lake, have been settled. Three or four juniors are suspended and more were to follow, but the principal decided that if all would sign an agreement not to participate in any more such affairs they would be reinstated. This they did upon the seniors sending in a written request in favor of reinstatement.

PANAMA CELEBRATES BIRTH ANNIVERSARY

A MATRIMONIAL OR POLITICAL PROJECT?

King Alfonso Goes with Advisor and Suite to Germany—Meaning Unknown in Madrid.

[SPECIAL TO THE GAZETTE]

Madrid, Nov. 3.—King Alfonso, accompanied by Senor Rios and a large suite, started today for Berlin on a visit to Emperor William of Germany. Alfonso's departure following so soon after President Loubet's visit and the fact that Senor Rios accompanies him, has given rise to the belief that the trip is of utmost political significance. On the other hand, it is stated that the visit has entirely to do with a matrimonial project.

Los Angeles, Cal., Nov. 3.—Eddie Hanlon and Aurelia Herrera are matched for twenty rounds here to-night before the Pacific Athletic Club, and unusual interest is displayed in the contest as Herrera is a man who has been feared by practically all the fighters, while Hanlon is well capable of taking care of himself in the liveliest scrummage.

DATE IS SETTLED BY ROOSEVELT TODAY

He Has Named the Last Thursday of November as Thanksgiving Day, Settling Disputes.

Thursday, November 30th, is to be set aside for a day of general Thanksgiving, according to the proclamation issued this morning by President Roosevelt. There has been a question as to what day would be decided upon, owing to the fact that November has five Thursdays. Some of the calendars have set aside the twenty-third and others the thirtieth.

Several football games between large college teams have been set for the thirtieth in expectation that this would be Thanksgiving day and in this they were right.

STUDENTS FACE MURDER CHARGE

Kenyon College Boys May Be Held For The Death Of Their Companion.

EVIDENCE IS FOUND OF FOUL PLAY

Blood Stained Rope And Wad Of Absorbent Cotton Lead To Belief That Pierson Was Chloroformed And Tied To Track.

Mount Vernon, O., Nov. 3.—Three lengths of bloodstained rope and a wad of absorbent cotton, also blood stained, were found buried under a culvert 200 feet from the spot where Stuart Pierson, the Kenyon college student, was killed by a train. Two linen cloths were also found. These were creased as though they had been used to blindfold the helpless victim. The authorities are much wrought up over the sensational discovery and are of the opinion that a charge of murder can be made against the students who caused young Pierson's death while initiating him into the Delta Kappa Epsilon fraternity.

Dr. Workman refused to commit himself to a positive statement as to whether young Pierson was tied down. He was subjected to a severe cross-examination by Prosecutor Stillwell and left the courtroom in a towering rage.

Threats Are Made.

That the authorities are proceeding under difficulties in the matter is shown by a letter received by Coroner Scarborough, signed by alumni of Kenyon college, threatening him with violence if he did not desist in his attempt to make trouble for the college. A statement of the letter follows:

"We do not want to make any threats, but if you do not cease your persecution of Kenyon college you will hear from us, and we will surely make it warm for you."

FIVE MEMBERS OF THE KENYON ALUMNI.

This, written on the stationery of the Hotel Donovan, was received from Delaware by Coroner Scarborough. It concludes a five-page letter demanding that the coroner cease his investigating of the death of Stuart Pierson. No names were signed, but no apparent attempt was made to disguise the handwriting.

Witnesses have been found to testify to having seen the unfortunate victim on the track. One man testified to such before the coroner's jury. He was so used to such sights in the college town, however, that he paid little attention to it, but afterward had the incident brought to his mind by hearing of Pierson's death. It was his impression that Pierson was tied to the track.

The coroner will pay no attention to the communication. Other vague threats have been made. It is claimed, against the coroner and prosecutor by Kenyon alumni.

ARMOUR CAR LINES BECOME DEFIANT TO GOVERNMENT

Deny Right of the Inter State Commerce Commission to Interfere.

[SPECIAL BY SCRIBNER'S MAGAZINE]

Washington, Nov. 3.—Armour car lines have hurled defiance into the teeth of the Interstate Commerce Commission today. Through their attorney, A. F. Reichman, they denied the jurisdiction of the commission over "private affairs" and refused to permit President George B. Robins of Chicago answer any questions. They protested against the dilatory policy of the inquiry, and charged that the commission was moved by political purposes, and declared the matter would be taken for adjudication before a "proper tribunal." How many cars of the Armour line are in the packing-house business? was the question asked. Robins' objection was that precipitated Reichman's objection. He contended that Armour & Co. were not in the carrying business, but leases their cars to railroads and furnishes refrigeration. He said the railroads don't fix the charges for refrigeration and the Armour line does not fix the transportation rates. Reichman denied that Armour & Co. and the Armour line were the same and declared if they were, it would be a private matter into which the commission had no right to inquire.

WARSHP SETS A NEW RECORD

Battle-Ship Rhode Island Attains a Speed of 19.33 Knots in Trial.

Rockland, Me., Nov. 3.—A new speed record for American battleships was established by the Rhode Island on her official standardization trial trip over the measured mile course off Owl's head, during which she steamed one mile at a rate of 19.33 knots in an hour. Another mile was made at the rate of 19.27, while the mean time for the twelve runs over the course was 18.93 knots an hour. The contract of the builders, the Fore River Ship Building company, called for a speed of nineteen knots, and the showing made by the vessel was most satisfactory not only to the trial board but to her builders.

Frederick Weyerhaeuser and Fourteen Others Made Defendants in a Suit.

[SPECIAL BY SCRIBNER'S MAGAZINE]

St. Paul, Minn., Nov. 3.—Suits were begun in the federal court today against Frederick Weyerhaeuser and fourteen other prominent wealthy lumbermen to recover twenty-six tracts of land for the government. It is alleged the lands were acquired innocently and exchanged for California lands from Frédéric A. Hyde, John A. Benson and C. E. Glöver, who are accused of land frauds in the west. C. W. Clark of San Francisco is the alleged agent of the trio. Washington state officials are said to be implicated.

The residence of M. Cohen at Plainfield was destroyed by fire with part of his household goods. The loss is \$1,200, fully insured.

ARE MOVING TO NEW QUARTERS

JANESEVILLE CLOTHING COMPANY
VACATING OLD LOCATION.

HAVE MODEL FACTORY NOW

Work in New Place To Be Com-
menced Monday—Operations Sus-
pended But Four Days.

From their old location at 17 and 19 South Main street to their new quarters on North Franklin street, known as the old buckle factory and formerly a portion of the Woodruff estate, is being moved the stock, machinery and other equipment of the Janeville Clothing company. The hands were laid off Tuesday evening and the work of removing commenced Wednesday morning. The management expect to have the Main street building entirely vacated by Saturday evening and the new plant practically in readiness for work at the same time. If this can be accomplished, as it seems probable it will be, operations will be commenced Monday morning with the regular force. Thus the employees are forced to take but a four-day vacation and though the company has orders ahead, the delay caused by moving will not be serious.

Fifteen More Machines

Fifteen men are busily engaged in taking machinery and goods from the old factory and placing it in the new. The failure on the part of the workmen, installing the electric elevator, to have their work finished before yesterday noon has caused a setback. The sewing machines have all been carried to the third floor and are being put in place and connected, but it is impossible without the elevator to put the stock and finished goods in their proper places on the second floor. It was expected that the elevator would be in running order today or sometime early tomorrow. Besides this new elevator, fifteen sewing machines have been added to the equipment. Ten of these are new and five were taken from the storage, the company having had no room for them in the old quarters.

An Increased Force

The start Monday morning will be made with the usual force of fifty hands. This number, it is expected, will be increased to sixty-five before the close of the second week from that time. But two or three new hands will be put at work at a time, it taking from half a day or two days to break in new help. From time to time through the coming year, new machines will be added and the force increased. Joseph Weber, a member of the clothing firm, states that the company expects to have eighty-five persons working in the factory before November 1, 1906.

Is Model Factory

More than twelve thousand dollars has been expended in remodeling the factory, and besides being ample in size it is a model in every respect. The old soft pine floors, even that in the basement, have been replaced by hardwood floors, the building has been repaired, externally and internally, and an office has been partitioned off. The lower floor is to be used for a stock room and the packing and shipping departments. The second floor is occupied by the cutting department and the offices, and on the third floor are the machines. Though the larger part of the force will work on the upper floor they will have but one flight of stairs to climb, the lower floor being below the level of the sidewalk, and the second floor but a few steps above. The total floor space is about 15,000 square feet, nearly double that at the company's command in the Main street building. Among the improve-

A New Preparation Which Everyone Will Need Sooner or Later.

Almost everybody's digestion is disturbed more or less, and the commonest thing they do for it to take some one of the many so-called blood purifiers which, in many cases, are merely strong cathartics. Such things are not needed. If the organs are in a clogged condition, they need only a little help and they will right themselves. Cathartics irritate the sensitive linings of the stomach and bowels and often do more harm than good.

Purging is not what is needed. The thing to do is to put the food in condition to be readily digested and assimilated. Stuart's Dyspepsia Tablets do this perfectly. They partly digest what is eaten and give the stomach just the help it needs. They stimulate the secretion and excretion of the digestive fluids and relieve the congested condition of the glands and membranes. They put the whole digestive system in condition to do its work. When this is done you need take no more tablets, unless you eat what does not agree with you. Then take one or two tablets—give them needed help, and you will have no trouble.

It's a common sense medicine and a common-sense treatment, and it will cure every time. Not only cure the disease but cure the cause. Goes after it in a perfectly sensible and we have testimonials enough to fill a book, but we don't publish many of them. However, Mrs. E. M. Faith of Byrd's Creek, Wis., says:

"I have taken all the tablets I got of you and they have done their work well in my case, for I feel like a different person altogether. I don't doubt if I had not got them I should have been at rest by this time."

H. E. Willard, Onstow, Iowa, says: "Mr. White, of Canton, was telling me of your Dyspepsia Tablets curing him of dyspepsia, from which he suffered for eight years. As I am a sufferer myself I wish you to send me a package by return mail."

Phil Brooks, Detroit, Mich., says: "Your Dyspepsia cure has worked wonders in my case. I suffered for years from Dyspepsia, but am now entirely cured and enjoy life as I never have before. I gladly recom-

ments in the building that will assist keeper, a harmless and docile animal which never annoyed anyone, died in agony. As this little creature never wandered far from his home it is believed that the poisoner is at work in that immediate vicinity.

DISASTROUS FIRE IN BROOKLYN TOWN

Large Portion of Business Section of
This Town of 1,000 Inhabitants,
Wiped Out Last Night.

Fire starting from a tank of gasoline in the Mercantile Co.'s general store at 6:30 last evening wiped out a large portion of the business section of the village of Brooklyn, located a few miles north of the county line. The first-named building, Frank Buchanan's general store, A. G. Ellis' drugstore, Snyder & Roberts' meat market, the postoffice building, Mason's confectionery store, and the Brooklyn News' building were destroyed. The fire departments of Madison, Evansville, and Oregon were called on for assistance and the flames were under control at 9:30. \$50,000 is the estimated loss. The Brooklyn bank was badly scorched, but was saved from total destruction. For a time it looked as if the elevator of the Farmers' Trading company and the Misspough furniture store were doomed. Tony Coyer, janitor of the public school building, narrowly escaped, being caught in a falling roof but jumped in time. This is the third time this same district has been burned in the last fifteen years. A. G. Ellis, the druggist, has been burned out three times within the last ten years. All of the stores will probably be rebuilt.

Minneapolis Men Send Down Lots of Money to Back the Gopher Team.

[REPRINTED FROM THE GAZETTE]

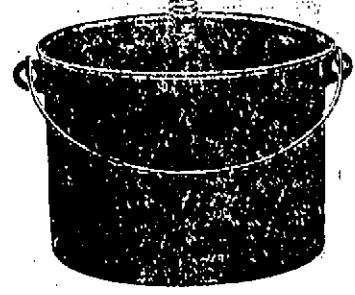

Madison, Wis., Nov. 2.—Two to one on Minnesota are the odds in the live betting on the big game. The placing of money on the contest began in Madison with the arrival of goodly bunches of Minneapolis cash, Thursday night, to be posted at prices of two to one in favor of a Minnesota victory or even money that Wisconsin will not score or that the gophers will make ten points or more. As the confidence at the Wisconsin headquarters took a great boost during the last two days, and particularly when the team left for the north, these prices were considered good and the first

telegrams from the Twin Cities that there was ample opportunity for "action" at these odds. More money was promised and pools were made up ready to wager.

The affluence of the gopher backers is a surprise here and indicates that supreme confidence reigns at Minneapolis. There will not be much Wisconsin money offered at

..COMING ATTRACTIONS..

GROUP OF DANCING GIRLS IN "THE ISLE OF BONG BONG," WHICH APPEARS AT MYERS GRAND TOMORROW AFTERNOON AND NIGHT.

Jos. R. Grismer's big country production of "Sky Farm" is conceded one of the most interesting, sweetest, purest and brightest plays of its class. It seems to excel particularly in fun and charming love-making and to have very few moments when there is any attempt to bring tears to the eyes or create any feeling of sorrow. It has a plot, of course, which is just complicated enough to ensnare the attention of the auditor, but its villainy is only introduced to add the necessary contrast to its moments of merriment. The play is coming to the Myers Grand Theatre on Tuesday, Nov. 7.

Manager Myers of the Myers Grand has at last been successful in securing B. C. Whitney's latest and airiest.

Labor Notes

Alabama Coal Miners are still on strike.

Justice Smith, of the Illinois Appellate Court, in an opinion handed down at Chicago, Franklin Union, No. 4, fined three members of that organization \$100 each and sentenced them to thirty days' imprisonment for violation of an injunction secured by the Chicago Typothetae.

A convention of mine workers of the three anthracite districts will be held in Shamokin, Pa., on December 14, when demands will be formulated to be presented to the coal companies next spring.

The American Federation of Labor has indorsed the appeal of the Shirt Waist and Laundry Workers' Union for financial assistance in aid of the starvers on strike at Troy, N. Y.

The Philadelphia, Pa., Central Labor Union has withdrawn its candidates for the Shrievealty and endorsed the Republican municipal ticket.

The officials of the International Typographical Union report that the eight-hour strike is practically won.

The Workmen's Federation at Buenos Ayres started a general strike recently. Congress has declared martial law throughout the country for ninety days.

A good thing—a want ad.

Thanksgiving Proclamation

Washington, D. C., Nov. 3.—The proclamation of President Roosevelt designating Thursday, Nov. 30, as Thanksgiving day has been issued. It is as follows:

A PROCLAMATION.

When, nearly three centuries ago, the first settlers came to the country which has now become this great republic, they fronted not only hardship and privation, but terrible risk to their lives. In those grim years the custom grew of setting apart one day in each year for a special service of thanksgiving to the Almighty, for preserving the people through the changing seasons. The custom has now become national and hallowed by immemorial usage. We live in easier and more plentiful times than our forefathers, the men, who, with rugged strength, faced the rugged days; and yet the dangers to national life are quite as great now as at any previous time in our history. It is eminently fitting that once a year our people should set apart a day for praise and thanksgiving to the Giver of Good, and, at the same time, that they express their thankfulness for the abundant mercies received, should manfully acknowledge their shortcomings and pledge themselves solemnly and in good faith to strive to overcome them.

During the past year we have been blessed with bountiful crops. Our business prosperity has been great. No other people has ever stood on as high a level of material well-being as ours now stands. We are not threatened by foes from without. The foes from whom we should pray to be delivered are our own passions, appetites and follies; and against these there is always need that we should war.

Therefore, I now set apart Thursday the thirtieth day of this November as a day of thanksgiving for the past, and of prayer for the future, and on that day I ask that throughout the land the people gather in their homes and places of worship, and in rendering thanks unto the Most High for the manifold blessings of the past year, consecrate themselves to a life of cleanliness, honor and wisdom, so that this nation may do its allotted work on earth in a manner worthy of those who founded it and of those who preserved it.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Mrs. Abby Truman is visiting with relatives here and on Friday celebrated her seventy-fourth birthday at the home of Mr. Wm. Truman. Dinner was served to a company of old friends.

Miss Eliza Finch of Whitewater spent from Thursday to Saturday with her friend Miss Orra Gould.

The M. E. Sunday school gave a concert and supper in Holbrook's hall on Thursday evening.

They have gotten up a soldiers' comedy ticket in Chicago, in opposition to the republican ticket, and some republicans have joined the movement. The copperheads all support the new ticket, and as one after another of the Union men on the ticket decline, they fill the vacancy with a copperhead.

LIMA

Lima, Nov. 2.—Mrs. Bowers returned Wednesday from visiting her sister who lives in Lodi.

Miss Effie Truman entertained a number of friends on Halloween. Ghosts and other novelties appropriate to the occasion were quite in evidence and everyone had a most enjoyable time.

Mrs. Abby Truman is visiting with relatives here and on Friday celebrated her seventy-fourth birthday at the home of Mr. Wm. Truman. Dinner was served to a company of old friends.

Miss Eliza Finch of Whitewater spent from Thursday to Saturday with her friend Miss Orra Gould.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done, at the City of Washington, this second day of November, in the year of Our Lord, One Thousand Nine Hundred and Five, and of the Independence of the United States the one hundred and thirtieth.

By the president:

THEODORE ROOSEVELT,
ELIOT ROOT, Secretary of State.

Mrs. Grace Gothonikson and daughter Mildred returned to their home in Milwaukee Wednesday after spending a few days with their parents Mr. and Mrs. Will Barton.

Mr. and Mrs. Russell Atkinson are rejoicing over the arrival of a son on Wednesday, October 25th.

Mrs. Frank Loveland of Monticello and Mrs. Orilla Fessenden of Monroe were guests of their sister Mrs. J. W. Wilson from Saturday until Monday.

The many friends here of Mr. Mutter will be pained to hear of his death which occurred at his home in Attica on Wednesday evening. Mr. Mutter had been ill for several months. He leaves a wife and little daughter.

Mr. Thomas Owens of Thayer, Neb., is here on a visit to his parents Mr. and Mrs. Ephriam Owens.

To Teachers' Meeting.

Supt. O. D. Antisdel and the teachers of our school, Miss Douglas and Miss Soper, will attend the meeting of the Southern Wisconsin Teachers association at Waukesha on Friday of this week.

To Elect Officers.

The first meeting of the Historical Club for this season will be held at the home of Supt. O. D. Antisdel Thursday evening, November ninth. New officers for the first half of the winter will be elected and the work of the club for the season discussed. This is one of Alton's most popular organizations and the meetings—

are full of interest and well attended.

Fair, followed by unsettled weather Saturday night.

"Every success admits of being outdone." The biggest store, in any line, in this city has not arrived yet. It is on the way—it may be here this time next year—it is almost entirely a matter of advertising.

Jim Davidson is still wondering if he or the state are to pay for his winter coal.

Rock county does not lose its prestige as the fourth county in population in the state.

It is still a question whether there is to be a vacancy in the Gubernatorial chair or not.

Chicago police have another mysterious disappearance to solve. This time free love and socialistic ideas seem to have caused the trouble.

Janesville has felt a real touch of winter and still survives while the wagon-loads of beets continue to bring prosperity to the farmers.

City Marshal Appleby has taken the right step. Drinking by police officers should be punished. Make them take their medicine if they are guilty, marshal.

Plenty of ginger is shown in the spirited attacks upon the insurance companies the country over. There is plenty of smoke, but where is the burning, purging fire?

It is a bad thing to advertise a city's misfortunes broadcast through the country, but Milwaukee certainly has had its share. Rose is still left however, and that helps some to mitigate the dishonor that Milwaukeeans feel.

Lonroot has not thus far found his announcement has led him to a bed of roses, while Jim Davidson, McGillicuddy, Stout and Houser are far from sleeping on couches these nights.

Beloit papers and citizens are much disturbed over the prospect of a Janesville man seeking the office of municipal judge of their new court. Why not? Janesville is noted for its attorneys and why not loan one to Beloit to give dignity to their court. Otherwise it might be a failure.

THE WAY TO BELIEVE IN ADVERTISING.

The average merchant—not the big and dominating one, but the average one—knows more about the kind of a location he should have, the kind of a building, the sort of fixtures, the grades and kinds of goods, the kind of clerks, the sort of delivery system, and credit system, the secrets of when and where and how to buy and the knack of really producing bargain offerings that he knows about the art of real and effective store advertising.

He devotes two hours of his time today to closing a deal for wrapping paper—another hour to teaching boys or girls how to wrap up packages—another hour to inspection of newly arrived goods—takes a look at the accounts—allows subordinates to take up his time with such weighty questions as that of where to have the delivery horses shod—and finds himself "too busy" to prepare a really forceful, human-interest store-advertisement.

Of course, "the average merchant" is not intentionally crippling his store—he simply allows a multitude of small things to shut out the importance of the really vital thing—the store-advertising. He "believes in advertising," but he does not see its rational part in the management of his store. He does not "believe" in it as he believes in attractive show-windows. He does not believe in it as he believes in polite clerks, in honest values, in fuel for the heating plant, in secure locks on his store-doors.

His "belief in advertising" is a little like his belief in political principles—not an urgent, insistent, every-hour belief, to be practiced aggressively and continuously, but a "belief," just the same.

When this "average merchant" learns to "believe in advertising" in exactly the same way that he believes in opening his store-doors at an appointed time; when he believes in it as an every-day elemental necessity in his business, and when nothing in connection with his store's management is more cleverly done

than his advertising—then he will cease to be an "average merchant," and will quickly join the ranks of exceptional merchants, whose stores become institutions in their cities.

COST AND WORK AT PANAMA. One of the most creditable bits of ignorant and malicious folly in the cabal of opposition to the Panama Canal is to be perceived in the clamor raised over the practical exhaustion of the initial appropriation of \$10,000,000. That appropriation was made on June 28, 1902, and now, exactly three years and a third later, it is nearly all gone. Oh, monstrous and profligate! Why, the Panama of the De Lesseps days was a model of pious frugality by the side of such squandering of the nation's wealth!

However, when the first class primary arithmetic takes the floor, it may appear that to spend ten millions in three years and a third is to spend three millions a year, and that really that is a very slow expenditure of money on a work that is to cost a hundred and fifty millions or thereabouts and is to be finished in something like ten years. If a hundred and fifty millions are to be expended in ten years, fifteen millions must be expended in each year, or five times as much as our canal administrators have been spending. So, instead of railing at the enterprise for profligacy, the critics might less foolishly find fault with it for parsimony.

The real question, of course, is not how much money has been spent in a given time, but how much there is to show for it. When that view of the case is taken, we believe there is nobody who is informed upon the subject and unprejudiced who will not concede that this initial appropriation has been profitably expended. The amount of actual excavation and construction has not been large. The work of surveying, exploring, sounding, rehabilitation of buildings, machinery, etc., has been enormous, and it was all essential and urgent. As for the work of sanitation, it was, as has been all along contended, of chief importance, and how promptly and effectively it has been done is to be perceived from the following account of the complete extirpation of yellow fever from the Isthmus. The fact that this great and beneficent work has all been accomplished in the last five or six months may be taken as an explanation, in part, of the fact that of the whole ten millions about half has been expended within the last year or less.

The story of the sanitary redemption of the isthmus, as authoritatively related by a reliable correspondent is interesting and instructive. It is also inspiring. There were no startling new discoveries or inventions. There was no indulgence in fads or fancies. There were simply the judicious application and the inexorable enforcement of well established principles by a Governor who realized what was necessary to be done and who earnestly and courageously set himself and his lieutenants to do it. It was a big job to disinfect every house in a whole city, and to have every inhabitant of a populous city inspected every day by a medical expert. But it was also, in another sense, a big job to eliminate one of the most dreaded and deadly of pestilences from a place which Froude once described as the worst plague spot in the world. One may confidently believe that every reasonable man who informs himself of what has been done at Panama in these three and a third years, and especially in these last five months, will say it has been well done and that the work is worth far more than it has cost.

Plenty of ginger is shown in the spirited attacks upon the insurance companies the country over. There is plenty of smoke, but where is the burning, purging fire?

It is a bad thing to advertise a city's misfortunes broadcast through the country, but Milwaukee certainly has had its share. Rose is still left however, and that helps some to mitigate the dishonor that Milwaukeeans feel.

comparable occurrence in Europe before this. John Hay wrote:

"The people will come to their own at last; God is not mocked forever!"

The Russian people have indeed come to their own at last. How they will deal with it the world waits to see with hopeful expectation. It is first to be seen whether the tardy concessions extorted from the hastening Czar will be accepted by the people in good faith, so that he will be retained upon the throne. There have been those of late who have clamored that the throne itself must go, and many have feared that any concessions now made would be too late to prevent an anti-dynastic movement of irresistible force. Yet there is ground to think that a conservative second thought will impel even the Radicals to pause before taking that extreme plunge, and to accept in good faith the Emperor's grant of constitutional liberty. Then it will remain to be seen what effect the Russian people will make use of their newly gained power. It has been a commonplace that the Russians are wholly unprepared and unfit for democratic institutions. Yet it must be remembered that in their local village administration, and even in provincial affairs, they have long been accustomed to a large measure of self-government. It would not be difficult or fanciful to trace a material resemblance between the village assemblies of Russia and those town meetings which were the preparatory schools of American republicanism; and it may be that even the hitherto hapless moujik will tomorrow rise up, not unworthy of his newly gained dignity.

Leaderless the revolution has been. But, now that it is practically effected, a leader is offered to it whom it will do well to accept. In making the Treaty of Portsmouth Count Witte did service enough and won fame enough to fill the measure of life. Yet today he is called to a more arduous work, to a more important service, and, if he succeeds,

to a higher glory. No man can envy him the tremendous responsibilities he is assuming. If, however, there is a man in Russia able to assume them and to discharge them aright, he is that man. The other day he won an unexpected victory in persuading the Autocrat to abdicate his autocracy without the further popular compulsion which was prepared and impending. Today his task is to win and to hold the confidence of the people and their agent to and co-operation in the scheme of constitutional government which he has devised. A fortnight ago Count Witte declared

that the Czar's greatest desire was to become a constitutional sovereign, and that his ideal was Edward VII. If now, as at once the monitor of the Czar and the mediator between him and the people and also the leader of the people, he can bring to pass the fulfillment of that high desire, he will perform a service and achieve a renown unsurpassed in all the history of the Russian Empire.

A Communication

To the editor Janesville Gazette:

Dear Sir: My attention has been called to the very excellent article on "Worry" in your issue of October 21st; and were it not for a somewhat persistent effort on the part of a certain class of people to attribute the healing accomplished by Christian Science to the "power of suggestion," I would not have asked for the privilege of a little space to offset a slight misconception.

In the article referred to there is at least an implied connection between Christian Science and the practice of hypnotic suggestion. The fact of the matter is, that they are entirely distinct and wholly different. Suggestion is a mere projection of the human will, while Christian Science teaches complete surrender of the divine will—"Not my will, but thine be done." Christian Science says to every patient healed, "Go and sin no more."

I have not heard of a practitioner of suggestion giving special attention to this Scriptural admonition. Christian Science teaches an intelligent sense of God as omnipotent, omniscient and sin no more."

GOOD COUNSEL.

The old proverb says: "In a multitude of counsellors there is wisdom."

Just so.

Surely the multitude of Janesville people, who are daily testifying to the ability of Dr. Richards to do painless dentistry, ought to be convincing that he is doing what he is talking about.

And when they one and all counsel you to try him for your dental work, it OUGHT TO BEAR WEIGHT WITH YOU.

Don't it look reasonable that what he does for them, he can do for you?

And if there is anything in the world that would please you, it is the thought of getting absolute immunity from pain in dental work.

But to prove it to your personal satisfaction Dr. Richards must be given the chance to do your dentistry.

Drop in and talk it over with him.

He will tell you exactly what the bill will amount to, so you can plan your resources and know where you will come out.

3,000 PEOPLE WILL SEE GAME SATURDAY

Janesville High School Football Team To Play South Side Milwaukee In Cream City.

Before a crowd that is expected to reach the three thousand mark the Janesville high school football team will battle with the South Side Milwaukee eleven Saturday afternoon on the Cream City gridiron. In view of the fact that South Side usually turns out an aggregation that is in the championship class and was defeated by the locals when they met two years ago, the Milwaukee papers announce the game as the best high school contest that will take place in the Wisconsin Metropolis this season. The Janesville boys hardly expect victory, but will go with a determination to make Milwaukee earn whatever success she has. The line-up will not be greatly changed. Waterman is back in the game and will doubtless play a guard position. Captain Devins is still out, suffering with an injured ankle. The team will probably be as follows: Le. C. Conners; It, Tierin; Ig, Waterman; C. Howland; rg, Woodworth or Gooden; F, Cassidy; re, Langdon; lh, Semett; rh, Mahoney; Tb, P. Connors, and qb, Wright. The latter is acting captain and will manage the team on the field.

A fine course has been secured by the entertainment committee of the Y. M. C. A. for the coming winter. The opening number will be Nov. 24th, when the Harmony Lady quartette, a combination of vocal and instrumental artists, will appear; Dec. 11th, the noted Slaton Jubilee singers; Feb. 16th, the Labadie, entertainment and literary; March 2d, S. A. Long of Dayton, Ohio, lecture; March 20, Maro the Prince of Magic with his Saxophone quartette. Great care has been taken by the committee in the selection of the talent, which insures to the patrons of the Y. M. C. A. a rare treat.

Art League Lecture

Mrs. Foote, who lectures before the Art League next Monday afternoon, treats the subject of dress from the standpoint of beauty, grace, adaptability, etc.—not the reform idea, but the rational and beautiful. She illustrates her ideas with changes of gowns from her own wardrobe.

Still, He Has Worn Well.

Milwaukee Sentinel: Half of Mr. Roosevelt's compulsory reelection in spite of himself, is, of course, nonsensical. Much now unexpected may happen between this date and 1908. One thing certainly not unlikely to happen is the waning of the president's present vast and deserved popularity—not, perhaps, through any fault or mistakes of his own, but through sheer reaction. All of us who heartily admire and believe in President Roosevelt hope he will retain the faith and favor of his countrymen to the close of his term.

But the tide of popularity does not stay at high water mark; and Mr. Roosevelt, reviewing the experience of other popular idols (not excepting George Washington,) may consider himself exceptionally fortunate if the ebb in his case does not set in before 1908.

Judith of the Plains

CHAPTER XI.

THE stars were still shining when Peter Hamilton looked at his watch next morning; but he sternly fought the temptation to lie another two minutes by remembering the day's work before him, and went in search of the horse that he had not picked over night, as the beast required a full belly after the hard night's ride he had given him. Peter had rolled out of his blankets with a keen anticipatory relish for the day ahead. It was well, he knew, that there was ample work of a definite nature for Peter the cow puncher; as for Peter the man, he was singularly at sea. Had Judith Rodney been his desert comrade all those cheerful years for him to get his first belated insight into the real Judith only a few little hours back? Or was it, he wondered, her seeming unconsciousness of him as she rode brave and sorrowful through the night to avert, if might be, her brother's death—at all events, to comfort and inspire the frightened woman and her little children—that had freshly tinged the friendship he had so long felt for her? Many were the questions that Peter vaguely put to himself as he started out for his long day in the saddle, and none of them were answered. Indeed, he could not satisfactorily explain to himself why he should think of Judith at all in this way. Surely it was a strange thing that he should discover himself in a sentimental dream of Judith!

For it was in such dreams that Katherine Colbrook had figured ever since Peter could remember. For years, indeed—and Judith knew it—he had stood, tame and tractable, waiting for Chloe to throw her dally lariat. But Chloe had intimated that her graceful fingers were engaged with the ink pot and her head with schemes for further something.

And there was Judith the great hearted, Judith who was as inspiring as a breath of hill air; Judith with no thought of career beyond the loyal doing of her woman's part, Judith, truly and loyal—and Judith with that acursed family connection!

Peter tightened his cinch and turned his horse westward. After a couple of hours' hard riding he could dimly make out specks moving on that huge background of space, and presently his horse neighed and put fresh spirit into his gait, recognizing his fellows in moving dots on the vast perspective, and, being a bant of some intelligence, for all his heavy footed tailings, he reasoned that food and rest would soon be his portion. Peter had no further use for the ravel.

Breakfast was already well under way when he reached camp. The outfit, seated on saddles in a semicircle about the chuck wagon, ate with that peculiar combination of haste and skill that doubtless the life of the saddle counters, as digestive troubles are apparently unknown among plainsmen. The cook, in handing Peter his tin plate, cup, spoon and black handled fork, asked him if "he would take overland trout or Cincinnati chicken this morning?" The cook never omitted these jocular inquiries regarding the various camp names for bacon. He seemed to think that a choice of alias was as good as a change of menu. There was little talk at breakfast, and that bearing chiefly on the day's work. Every one was impatient for an early start. The horse wrangler had his string waiting, the cook was scouring his iron pots, saddles were thrown over horses fresh from a long night's good grazing, cinches were tightened, stirrups and blankets were adjusted, and camp melted away in a troop of horsemen winding away through the gray of early morning.

The scene of the beef roundup was a mighty plain, affording limitless scope for handling the cattle of a thousand hills. The specks in the far distance began to grow as if the screw of a field glass was bringing them nearer, turning them into horsemen, bunches of cattle, chuck wagons of the different outfits, reserves of horses restrained by temporary rope corrals—all the equipment of a great roundup. Dozens of men, multitudes of horses, herds of cattle—the mighty plain swallowed all the little, prancing, galloping, bellowing things, and still looked mighty in its loneliness. Men darted hither and thither, yelling shrilly; cows, born apparently to be leaders, broke from the bunches to which they had been assigned and started at a clumsy run, followed by kindred susceptible to example. Cow punchers, waiting for just such manifestations of individuality, whirled after them like comets, and soon they were again in the pawing, heaving, sweltering bunch to which they belonged.

Peter Hamilton, whose particular skill as a cow puncher lay in that branch of the profession known as "cutting out," found that the work of the rustlers had been carried on with no sparing hand since the early spring roundup. Calves bearing the H L brand that claimed by a company, known to be made up of cattle thieves—followed mothers bearing almost every brand that grazed herds in that part of the state. The Wetmore outfit, that used a W inclosed in a square, were apparently the heaviest losers. The cows and calves were herded at the right of the plain, convenient to the branding pen, the steers well away to the opposite side. As Peter drove a W-square cow followed

folded it up and with sentimental significance returned it to the left side pocket of his flannel shirt and remarked to Peter, "It's from her."

"Indeed," said Peter, who had not the faintest notion who "her" could be. "Let me congratulate you."

"Yes, sir," and there was conviction in the cow puncher's tone: "It's from old man Kinskin's girl, up to the Basin, and the parson's going to give us the life sentence soon. A man gets sick o' hellin' it all over creation."

He rolled a cigarette, lit it, took a puff or two, then turned to Peter. "Is it that, or is it that we're getting on a little long in the tooth, logy, in our movements? If I thought it was because we were getting on I'd stampede this here range. It don't seem fair to a girl to allow that you're broke, tamed and know the way to the corral when it's just that you're needin' to go to an old man's home."

(To be Continued.)

by a little white faced calf whose brand had plainly been tampered with, he heard one of his associates say:

"There's nothing small about the H L except their methods."

"What's the H L stand for anyway?" the other cow puncher asked.

"Why, H-L, or How Long. Depends whether you're with 'em or agin 'em."

Peter wheeled from the men and headed for the bunch he was cutting out. He fancied that the man had looked at him strangely as he offered a choice of meanings for the H L, and yet he could not have known that Peter had gone to Rodney's cabin last night. He flung himself heart and soul into his work, dashing full tilt at the snorting, stamping bellows enveloped in clouds of dust that dimmed the very daylight. Calves bleated piteously as they were jammed in the thickening pack. Peter shouted, swung the rope right and left, thinning the bunch until him, and a second later emerged, driving before him a cow, followed by a calf. These were turned over to cowboys waiting for them. Time after time Hamilton returned to that mass of unconscious power that with a single rush could have annihilated the little band of horsemen that bounded them with the skill of a dealer shuffling, cutting, dealing a pack of cards.

To the left were the steers, pawing and tearing up the earth in a very ecstasy of impotent fury. But a handful of cowboys kept them in check, circling round and round them on ponies that did their work without waiting for quiet or rowd.

The noonday sun looked down upon a scene that to the eye unskilled in these things was as confusion worse confounded. Cowboys dashed from nowhere in particular and did amazing things with a bit of rope, sending it through the air with snaky undulations, after flying cattle. The rope, taking on lifelike coils, would pursue the flying beast like an aerial reptile; then the noose would fall true, and the thing was done. A second later a couple of cowboys would be examining the disputed brand on the prone animal.

The smell of burning flesh and hair rose from the branding pens and mingled with the stench of the herds in one noisome compound. The yeasts of the cow punchers, each having its different bearing on the work in hand, were all but lost in the dull, steady roar of the cattle, bellowing in a chorus of fear, rage and pain. And still the work of sorting, branding, cutting out went steadily on. Though an outsider would not have perceived it, the work was as crisp cut and exact in its methods as the work in a counting house.

The beef contract called for a thousand steers four and five years old, and these having been "well" and duly counted and some dozen extra head added in case of accident, they were immediately started on the trail, as they could accomplish some seven or eight miles before being bedded down for the night. Hamilton, who had crossed to the beef side of the roundup to have a necessary word with the Circle Star foreman, was amazed to find Simpson making ready to start with the trail herd. Peter inquired, with a few expletives, how long he had been a cow man in good and regular standing.

"As far as the regularity is concerned, that would be a pretty hard thing to answer, but he's had an interest in the XXX since—since—"

"He drove Rodney's sheep over the cliff!"

"Ain't you a little hard on the beginning of his cattle career? It usually goes by a more businesslike name, but—" he shrugged his shoulders—"it's up to the XXX. We wouldn't have him help to pull bogged cattle out of a creek."

"Well, there goes as pretty a bunch of porters as I want to put tooth to. If I get away from here within the next two months, as I'm expecting, doubtless, I'll meet some of you again with your personality somewhat obscured by reason of fried onions."

The foreman of the Circle Star waved his hand after the slowly moving herd that gradually pressed forward like an army in loose marching order. Outriders galloped ahead, like darting insects, and pointing the lumbering mass that trailed its half mile length at a snail's pace.

After supper came general relaxation around the campfire. The men, who had all day been strung to a keen pitch of nervous energy, lounged in loose, picturesque uncouthness, while each began to unravel his own lively miscellany of information or invention. There was jest, laughter, spinning of yarns, singing of songs. As Peter lay in the firelight smoking his briarwood, he noticed that the man next him spent a great deal of time poring over a letter, holding it close to the blaze, now at arm's length, which was hardly surprising, considering the penmanship of the more common variety of billet-doux. The man was plainly disappointed that Peter would not notice or comment. Finally he

folded it up and with sentimental significance returned it to the left side pocket of his flannel shirt and remarked to Peter, "It's from her."

"Indeed," said Peter, who had not the faintest notion who "her" could be. "Let me congratulate you."

"Yes, sir," and there was conviction in the cow puncher's tone: "It's from old man Kinskin's girl, up to the Basin, and the parson's going to give us the life sentence soon. A man gets sick o' hellin' it all over creation."

He rolled a cigarette, lit it, took a puff or two, then turned to Peter. "Is it that, or is it that we're getting on a little long in the tooth, logy, in our movements? If I thought it was because we were getting on I'd stampede this here range. It don't seem fair to a girl to allow that you're broke, tamed and know the way to the corral when it's just that you're needin' to go to an old man's home."

(To be Continued.)

by a little white faced calf whose brand had plainly been tampered with, he heard one of his associates say:

"There's nothing small about the H L except their methods."

"What's the H L stand for anyway?" the other cow puncher asked.

"Why, H-L, or How Long. Depends whether you're with 'em or agin 'em."

Peter wheeled from the men and headed for the bunch he was cutting out. He fancied that the man had looked at him strangely as he offered a choice of meanings for the H L, and yet he could not have known that Peter had gone to Rodney's cabin last night. He flung himself heart and soul into his work, dashing full tilt at the snorting, stamping bellows enveloped in clouds of dust that dimmed the very daylight. Calves bleated piteously as they were jammed in the thickening pack. Peter shouted, swung the rope right and left, thinning the bunch until him, and a second later emerged, driving before him a cow, followed by a calf. These were turned over to cowboys waiting for them. Time after time Hamilton returned to that mass of unconscious power that with a single rush could have annihilated the little band of horsemen that bounded them with the skill of a dealer shuffling, cutting, dealing a pack of cards.

To the left were the steers, pawing and tearing up the earth in a very ecstasy of impotent fury. But a handful of cowboys kept them in check, circling round and round them on ponies that did their work without waiting for quiet or rowd.

The noonday sun looked down upon a scene that to the eye unskilled in these things was as confusion worse confounded. Cowboys dashed from nowhere in particular and did amazing things with a bit of rope, sending it through the air with snaky undulations, after flying cattle. The rope, taking on lifelike coils, would pursue the flying beast like an aerial reptile; then the noose would fall true, and the thing was done. A second later a couple of cowboys would be examining the disputed brand on the prone animal.

The smell of burning flesh and hair rose from the branding pens and mingled with the stench of the herds in one noisome compound. The yeasts of the cow punchers, each having its different bearing on the work in hand, were all but lost in the dull, steady roar of the cattle, bellowing in a chorus of fear, rage and pain. And still the work of sorting, branding, cutting out went steadily on. Though an outsider would not have perceived it, the work was as crisp cut and exact in its methods as the work in a counting house.

The beef contract called for a thousand steers four and five years old, and these having been "well" and duly counted and some dozen extra head added in case of accident, they were immediately started on the trail, as they could accomplish some seven or eight miles before being bedded down for the night. Hamilton, who had crossed to the beef side of the roundup to have a necessary word with the Circle Star foreman, was amazed to find Simpson making ready to start with the trail herd. Peter inquired, with a few expletives, how long he had been a cow man in good and regular standing.

"As far as the regularity is concerned, that would be a pretty hard thing to answer, but he's had an interest in the XXX since—since—"

"He drove Rodney's sheep over the cliff!"

"Well, there goes as pretty a bunch of porters as I want to put tooth to. If I get away from here within the next two months, as I'm expecting, doubtless, I'll meet some of you again with your personality somewhat obscured by reason of fried onions."

The foreman of the Circle Star waved his hand after the slowly moving herd that gradually pressed forward like an army in loose marching order. Outriders galloped ahead, like darting insects, and pointing the lumbering mass that trailed its half mile length at a snail's pace.

After supper came general relaxation around the campfire. The men, who had all day been strung to a keen pitch of nervous energy, lounged in loose, picturesque uncouthness, while each began to unravel his own lively miscellany of information or invention. There was jest, laughter, spinning of yarns, singing of songs.
